

Khakhi Diary / PMS — Sub-Tab & Case Lifecycle Workflow

Complete Operational Flowchart with Group & Sub-Tab Metric Counters (Total, Pending, Disposal)

Official Police Management System Architecture Specification

2 Disposal vs. Pending Fetch Logic (Forms 1 to 5 & Form 6)

Data Automation Logic

Counter	Field Trigger & Fetch Condition	Qualified Disposal Fields (No & Date)	Default Action
DISPOSAL Disposed	A case in Form 1 to 5 and Form 6 is fetched into DISPOSAL when <u>any one</u> of the 7 official finalization Number & Date pairs is filled:	• CC. No & Date • ST. No & Date • A Final No & Date • B Final No & Date • C Final No & Date • NC Final No & Date • Abated Summary No & Date	Moved to Disposal tab & counted in sub-tab disposal metric.
PENDING Pending	When none of the 7 disposal numbers & dates are filled (all remain blank/empty), the case automatically stays/fetches into PENDING .	<i>All 7 disposal fields are empty/null (Active IO investigation, awaiting charge sheet, or trial pending).</i>	Remains in Pending tab requiring police investigation attention.
TOTAL All Cases	TOTAL = PENDING + DISPOSAL (Sum of all registered cases in the sub-tab).		Resets table filter to show all records.

3 Sub-Tab Page Feature Matrix

Operational Capabilities

Feature Component	Description	User Benefit
Header Summary Cards	Three live metric cards: Total , Pending , and Disposal with sub-text indicators.	Gives instant supervisory overview of crime status in that category.
One-Click Metric Filtering	Clicking any counter card instantly filters the case data table below without reloading the page.	Enables fast triage of pending workload for officers and reviewers.
Search & Date Range Filter	Search by CR No, Accused Name, Complainant Name, IO Name, and filter by Registration Date range.	Quickly locates specific cases during scrutiny or inspection.
Category-Aware `+ New Case`	Opens the Common Form with the sub-tab's crime category and core IPC/BNS Section pre-selected.	Eliminates repetitive data entry and minimizes misclassification errors.
Row Action Suite	Direct buttons for View Detail , Edit Form , Generate Case PDF , and Transfer .	Streamlined access to complete case actions directly from the sub-tab table.
